Jaye Slade Fletcher : Creating Custom Art Tiles: The Moravian Method before purchasing it in order to gage whether or not it would be worth my time, and all praised Creating Custom Art Tiles: The Moravian Method:

0 of 0 people found the following review helpful. Good things in a small package.By Jim MonacoA short but informative summary of one way to produce three dimensional tiles.The most creative aspect of the book was using large font to expand the scantnumber of pages.3 of 3 people found the following review helpful. ANOTHER VALUABLE TEACHING BOOKBy Linda ZamoraThis is the second book I've gotten in this series. I'm just getting started trying out how to carve out my own designs. I love Art Nouveau so I tried to carve an Art Nouveau design using the method described by the author, but I think I picked a design that was too complicated--just like the author

warned--so I used a simpler design with larger lines and my new tile is GORGEOUS! I mean, beautiful! I haven't tried making a plaster mold of it yet, but I will do that this weekend. I want to make a number of these new tiles with different glazes to hang in a display in my entry hall. SO exciting! This method of designing art tiles takes a little practice and I'm new at this stuff, but I'm pretty excited about it because now I can use nearly any picture that appeals to me and carve it into clay. It seems every pretty design I see now, I want to start carving it into clay! I know I'll be playing around with designing my own tiles now for a long time to come! (PS: I did notice that a couple of the black and white photos in this book seem a little blurry, but you can still see and follow what's going on.) OK, back to my workroom! 0 of 0 people found the following review helpful. Great book By Stephanie Corridori Another great book in this series. Loved to see how these gorgeous tiles came to life, would recommend to anyone interested in creating custom art tiles.

This easy to follow how-to guide shows you step by step how to create your own unique raised relief art tiles using the 'slip blanket' method developed by Henry Chapman Mercer, founder of The Moravian Tile Works in the late 1800's. Dozens of (b/w) photos plus practical tips guide you through every step of the process, including how to make a plaster mold of your finished piece. Begin creating your own custom art tiles today--Here's how!
