McDowellI have embroidered for years and never had a good book on animals. I am doing a 50 state, flower, and bird quilt and only lack 10 blocks. Wished I would have had this book before I could have done way better birds on this project. it is a really good book. So the last 10 will look very different now. Oh well it is for me. My mother started it for me and I am finishing it for me. Going to be an amazing accomplishment. Quit a wonderful thing to hand down in our family. The book was used and it was in perfect shape and thank you for the marvelous service. Elaine in TEXAS!0 of 0 people found the following review helpful. Book is very clean. In this fourth title in her Masterclass Embroidery series, Helen M. Stevens reveals more of the secrets of achieving astonishingly lifelike effects using pure silk thread. In five fascinating chapters Helen explores a variety of animals that are linked in different ways - whether by their ferocity as predators, their closeness to man as familiar countryside dwellers or as among the world's weirder creatures like the platypus. Each chapter leads towards a master class project with colour templates. Easy to follow colour photographs illustrate the working stages of the design to ensure that

perfect results are achieved.

Oct/Nov 05 ...the animals are brought to life by Helen's astonishingly lifelike effects using pure silk threads. She explores a variety of animals, from the simple fieldmouse to the duck-billed platypus and the koala bear...There is something for all embroiderers in this book...Each stage of the design is photographed in colour to ensure that perfect results are achieved. **StitchAbout the Author**Helen M.
