**Betty Doty, Rebecca Meredith : Hey Look I Made a Book** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Hey Look I Made a Book:

0 of 0 people found the following review helpful. Favorite - simple and sweet By Mrs. Jules This is a good book for the absolute beginner. It has simple instructions to make a book as the title suggests and then say "Hey Look..." It is one of my favorite craft books and it's small (like pocket sized). If you want to make your first book and don't want to wade through too much information, this is the book. There are some amazing more complicated options with lots of different covers and binding styles, but this book is about making a regular journal-like book with signatures, a spine and a cover. It's a gem. 2 of 3 people found the following review helpful. Really, book making (right on your kitchen table) made simple! By Lee Say Keng From the recent spring cleaning of my personal library, this little palm-size book suddenly caught my eyes again. It's a step-by-step guide to creating your own notebook, sketchbook, dreambook,

anything book. I remember I bought it at the time when I was just starting up my own retail store (specialising in learning creativity books) to complement my strategy consulting business. Actually, it is perfect for anyone who want to build multiple copies of his or her writings or create personalised blank books. I thought I could use it to guide me in creating something unique that I could give away as 'thank-you' gifts to VIP customers. I eventually did some serious work but never got down to finishing the final prototype: an idea notebook. Nevertheless, the many practical hints in the book eventually inspired me to develop beautifully customised business proposals for my clients. To sum up, with this wonderful book, plus a little imagination some paper, glue, cloth, cardboard, thread a needle, you can start binding your own memorable book right on your kitchen table.
