Taking a decorative approach to horticulture, the author shares specific advice on the cultivation and placement of herbs and offers instructions, recipes, and craft ideas for using herbs

From Library Journal The gardener or cook who wishes to grow herbs on a small scale will find this a useful guide to raising 22 kinds in pots, either for decoration or for cooking. Zabar covers soil preparation, methods of starting plants, care, and includes 17 recipes. In one excellent chapter he covers training herbs into topiaries, and in another discusses using them to make wreaths, sachets, and similar items. (Zabar acknowledges the help of herb farmer Sal Gilbertie, whose more comprehensive Kitchen Herbs , LJ 4/15/88, deals with growing herbs in a garden and has over 100 more recipes.) Zabar's is an appealing title for apartment dwellers or those needing only a few fresh herbs. Small line drawings by the author. Terry M. Cole, Harrisville Central Sch. Lib., N.Y.
